

# Frontend Assignment

7<sup>th</sup> July 2024

## OVERVIEW

The "Intract Academy" landing page project aimed to create a dynamic and engaging web experience for users interested in exploring educational content and resources. Developed using modern frontend technologies, the project focused on delivering a seamless user interface with robust elements and responsive design principles.

## GOALS AND MILESTONES

1. **Responsive Design:** Created a fully responsive landing page for Intract Academy, ensuring optimal usability across all devices.
2. **Code Readability:** Maintained clean and organized code using React components, enhancing readability and ease of maintenance.
3. **User-Friendly Interface:** Implemented intuitive UI/UX principles for clear navigation and content presentation, enhancing user experience.
4. **Timely Delivery:** Completed the project ahead of schedule, demonstrating effective time management.
5. **Skill Showcase:** Demonstrated proficiency in ReactJS, TailwindCSS, and Vite, showcasing expertise in frontend development.

## SPECIFICATIONS

"The project involved developing a responsive landing page for Intract Academy using modern frontend technologies. Built primarily with ReactJS and styled using TailwindCSS, the page adheres to a user-centric design approach, ensuring optimal usability across various screen sizes and devices. Key features include interactive elements facilitated by React Router DOM, seamless integration of CSS Grid for layout management, and efficient use of JavaScript for enhanced functionality. The design prioritizes user experience with a clean, intuitive interface and adheres to best practices for code readability and maintainability. The project was completed ahead of schedule, showcasing strong time management skills and attention to detail in design execution."
